You give your best every day. Here is ours.

The new jet X.

It comes with a completely new nozzle concept.

Features a basic or digital options with an unprecedented range of functions.

Packed with features that make the difference.

We did this for one reason alone: to make it easier for you to be better.

Looks good for you: the design: The beginning of a new design era at SATA.

Balanced - in every respect: The jet X DIGITAL ready is approx. 50 grams lighter than its predecessor. The ergonomic gun body sits comfortably in the hand and is balanced so that it does not become top-heavy even with a large filled cup.

Easy to clean: the detachable trigger: The trigger can be removed in one easy step - without tools (excludes basic). The integrated tool can be used to loosen or tighten the fluid tip.

3 in 1: the innovative air inlet: The air micrometer for setting the dynamic inlet pressure is located at the air inlet. It allows convenient and precise adjustment of the air pressure.

I/O = Control and Speed

The jet X nozzles are available in two fan shapes:

The "I", or "Control", nozzles produce a longer spray pattern with an even material distribution. They have a slower application speed but offer maximum control.

The "O", or "Speed", nozzles have an oval fan shape with a larger fade-out zone and a wetter core, which results in a higher application speed.

This means that every painter can choose the nozzle system that suits their own preferences and application technique.

Regardless of which nozzle type is selected, the respective fan dimension remains constant across the different nozzle sizes. Only the material throughput changes linearly with the size.

3M Science.
Applied to Life.™

3M™ PPS™ Series 2.0 Vented Spray Cup System

Ready-to-go for painters on the go.

When high standards are the expectation, you need equipment that delivers consistent results. Introducing the 3M™ PPS™ Series 2.0 Vented Spray Cup System - bringing the advantages you expect from a premium vented cup with the proven technology of the first disposable spray cup system in the world.

Ready to Use Instantly

When speed and efficiency are vital, grab-and-go tools can make all the difference. With built-in filters and ready-to-use vents, minimal assembly is required before stepping into the booth.

Consistent Material Flow

Quality paint jobs matter, especially when your reputation is on the line. From start to finish, these vented spray cups provide a consistent material flow, even down to the final ounces (mL).

Confident Cup Design

Make the most of your time in the booth by using our largest cup (32 oz / 950mL) – one of four different sizes available. A sturdy but flexible cup design allows you to put your mind at ease when temporarily storing leftover paint. With no reusable parts, it's like spraying with a new cup every time.

Paint Application Expanded

When you buy into 3M Science, you are getting innovation, performance, and efficiency. These threads are carried all the way through our products for the paint shop, allowing you to choose the right tools for the job. With a premium spray gun, disposable lined spray cups, removable nozzles – and now vented spray cups – 3M's suite of paint application tools is truly unmatched.

RPS Multipurpose Cup System

- Bendable – allows the painting of sill areas or wheel arches "overhead"
- Stable – due to the screw connection between cup and lid, the cup always remains on the lid and gun even when touching obstacles.
- Easy removal of the lid in case of emergency – without soiling the working area
- Clean removal of the cup – by pressing the cup in, vacuum is created, which empties the material passage when pulling the trigger
- Constant material flow – helps the painter to achieve perfect coating results just like child's play

KLE.CMP229

Self-Adhesive Light Box Protect Film

- Covers lite box glass in spray booths
- Eliminates labored cleaning method of glass
- Temp resistant up to 200 degrees
- Preserves booth lighting without distortion or deflection
- 24 x 100'

RBL.435

Spray Booth Wall Film

- Durable, puncture resistant plastic film
- Self adhering leaves no adhesive transfer
- Eliminates labor intensive removal of spray or roll-on peelable coatings
- Cuts booth maintenance time in half
- Resists heat up to 200 degrees
- Remove every 60-90 days
- 36 x 100'

RBL.438

Dirt Control Floor Coat and Pump Spray

- Reduces airborne particles in the spray booth by over 50% and traps them on the floor
- Significantly reduces buffing time caused by dirt in the paint job
- Fast and easy once-a-day application using a pump sprayer
- Traps particles on the floor, not on the vehicle
- Water-based, low VOC

Cubitron™ 3
Performance Abrasives

A new era of abrasive performance is here.

3M™ Cubitron™ 3 Cut-Off Wheels

3M™ Cubitron™ 3 Cut-Off Wheels with their fast cutting and long-lasting performance improve productivity and efficiency in various body shop cutting processes.

These Cut-Off Wheels are built with the 3M™ Cubitron™ 3 Precision Shaped Grains – designed with sharp, angular structures that continuously fracture to form fresh, sharp points that allow the discs to slice faster, and last longer. They will cut through most materials, including high strength steels, stainless and mild steel.

FOR HEAT RESISTANCE THAT SMOKES THE COMPETITION, IT CAN ONLY BE RAPTOR

There's no room for questions when it comes to protection in the most demanding of elements. That's why there's RAPTOR High Heat.

RAPTOR High Heat formulations use cutting-edge ceramic technology, allowing the bonding of color pigments with the resin matrix during the heat curing phase. The bottom line? This proprietary formula provides superior color stability and adhesion to substrates exposed to high-temperature environments.

RAPTOR High Heat aerosols boast world-class RAPTOR durability and protection in a formulation for every job. From the professional-quality Raptor Roll Bar and Chassis to the tough-as-nails Flame Proof Paint, each product is tailored for applications, ensuring your ride not only endures the heat but does so with Raptor toughness and confidence.
